40' Standard Container	\$9300.00 USD
40' HC Container	\$9800.00 USD

Your design – If you can imagine it ... we can build it at the factory and deliver directly to your site ... *all openings are reinforced at the factory ... we verify your design and engineer up to 8 containers high and in any configuration*

You finish inside and outside ... containers arrive painted inside and outside.

See other information sheet for building tips and recommendations

!!! Note: Many people think they can take a used (or “one time”) shipping container to convert to a shop or living container ... see the attached information sheet to see why this is not a good or cost effective solution. We cut, reinforce & paint your openings ... much less expensive ... at the factory.
